Torino, March 29th, 2017

The “microRNA/adhesion molecule and tumor progression” Laboratory at the MBC, Dept. of Molecular Biotechnology and Health Sciences, University of Torino, is looking for a young Postdoctoral Fellow to study the role of miR-214 and miR-148b in melanoma progression. A 12 months-fellowship is available, funded by a “Progetto di ateneo SanPaolo/Unito grant”. Candidates should have a PhD and good experience in molecular and cellular biology. A background in mouse genetics is preferred. Good knowledge of English is essential.
