

ICGEB International Centre for Genetic
Engineering and Biotechnology

Developing
Knowledge

The position of a

Post-Doctoral researcher

is available in the Cardiovascular Biology Laboratory at the International Centre for Genetic Engineering and Biotechnology. The project focuses on cardiac angiogenesis and cancer, with particular interest in understanding the reasons for the poor angiogenic capacity of the adult heart.

Applicants must hold a PhD in Biology/Biochemistry (or an equivalent scientific degree), be highly motivated, independent and senior enough to organise the work of technicians and biological or medical doctoral students and integrate themselves into a team. An excellent background in cardiovascular/cancer biology and experimental animal work are required, as is fluently spoken English.

The candidate will work in a very international and highly motivated, well-financed environment with most modern equipment. The position is for 2 years and currently available. For further information see: <http://www.icgeb.org/cardiovascular-biology.html>

Applications including a full CV, publication list, as well as the contact addresses of 2 referees should be sent to:
