JUAN DE LA CIERVA POSTDOCTORAL POSITION
at the Spanish National Cardiovascular Research Center (CNIC)
Madrid – Spain

Molecular Genetics of Angiogenesis
PI: Rui Benedito

POSITION OPEN:
JUAN DE LA CIERVA-FORMACIÓN (2017)
JUAN DE LA CIERVA- INCORPORACIÓN (2017)

We are looking for candidates for a Grant application contract to Juan de la Cierva (“Formación” and “Incorporación”) 2017

Grant application Jan2018

2 years contract

Funding agency: Ministerio de Economía, Industria y Competitividad (Juan de la Cierva Program)

JOB DESCRIPTION

We are looking for candidates to apply for a PostDoc position in the laboratory of **Dr. Rui Benedito (Molecular Genetics of Angiogenesis)**, at the CNIC. The laboratory is funded by CNIC, MINECO and the European Research Council. PostDoc position offer is very competitive and includes social benefits. Possibility also to apply to a more independent junior leader fellowship in the future.

The group uses a combination of advanced mouse models, several in vitro systems, quantitative gene expression analysis and the latest imaging technologies to further understand the biology of blood vessels and associated tissues. The Postdoc work will involve the use of new inducible fluorescent genetic mosaic (ifgMosaic) mouse models recently generated in the laboratory (Pontes-Quero et al., Cell 2017), and the study of cell-to-cell communication and synchronization during cardiovascular and cancer development.
