

# Post-Doctoral Position

## How we protect our genome(s)?

Laboratory / Department: Sfeir Lab / Skirball Institute of Biomedical Research-  
NYU Medical Center

<http://www.sfeirlab.com/>

### Research Description:

A Post-Doc position is available in the laboratory of Dr. Agnel Sfeir, Associate Professor at the Skirball Institute of Biomedical Research – NYU Medical Center-New York, USA. The lab studies the pathways that maintain nuclear and mitochondrial genome stability in eukaryotic cells. For the advertised position, molecular genetics and biochemical approaches will be used to address questions related to pathways that repair DNA breaks. Furthermore, in vivo analysis using mouse models will be employed to assess the impact of erroneous repair during cancer progression.

Applicants should hold a Ph.D in a relevant research area such as genetics, cell biology, biochemistry, or molecular biology. The position is available immediately and funding is guaranteed for two years.

Applicants should send a cover letter describing their scientific experiences, their CV and bibliography, as well as contact info for 3 references to [Agnel.Sfeir@med.nyu.edu](mailto:Agnel.Sfeir@med.nyu.edu)
