

POST-DOC POSITION AVAILABLE/MRC

Dear all,

I have a post-doc position available in my lab with funding from MRC until Dec 2021. The project is funded to undertake a simple biomarker study in retinal microvascular disease. At the same time funds are available for a capacity building project allowing free development into any vascular biology area in my lab. The successful candidate is expected to have applied for independent fellowships by the end of the grant period.

This is an exciting opportunity for a bright and ambitious early career scientist. Further information including a detailed job description and instructions for applications can be found at:

<https://bit.ly/2KztUKG>

Deadline for applications is July 15, 2018.
