

A post-doctoral position is available in the laboratory of **Dr. Sirio Dupont** in the Department of Molecular Medicine of the University of Padova to study new regulatory mechanisms of metabolism, funded by a CARIPARO Eccellenza 2017 grant.

The current research of the lab is focused on mechanotransduction and how this regulates signaling and metabolism. The ideal candidate should have a PhD in the field of molecular biology, cell biology or biochemistry and relevant publications. Previous experience in cell culture and biochemistry is recommended.

Enquiries and applications can be sent to sirio.dupont@unipd.it explaining why you are interested in joining the lab, including a CV with a brief research synopsis, and contact information for 2 references (name, address, email and phone number). Start date: autumn 2018.
