

Open position in Prof. Corradini's Lab, INT

Fellowship is available in Prof. Corradini's Hematology Laboratory of the Department of Medical Oncology and Hematology of the Fondazione IRCCS Istituto Nazionale dei Tumori (INT), to work in close connection with the clinical group to use novel sequencing approaches for the detection of minimal residual disease in lymphoid tumors (Biancon et al. 2018).

The ideal candidates have a bachelor degree in Pharmacology, Biotechnology or Biology, with strong interest in NGS and data analysis. Previous experience in molecular biology field would be a positive element for the selection of the candidate.

We are looking for enthusiastic, motivated people, with good organizational and relational skills, and a basic knowledge of English.

The fellowship will be initially for one year with possible extensions.

Potential applicants are encouraged to send a brief description of interests and a CV to paolo.corradini@unimi.it and to cristiana.carniti@istitutotumori.mi.it
