

**Staff Scientist position is available in the DNA replication and genome stability laboratory lead by Francesca M. Pisani at the Istituto di Biochimica e Biologia Cellulare (IBBC, ex IBP), CNR, Via P. Castellino 111, Naples, Italy.**

The selected candidate will join a project focused on the analysis of the coupling between DNA replication and sister chromatid cohesion in human cells. Complementary experimental approaches will be used including biochemistry, molecular and cellular biology techniques as well as single-molecule biophysical analyses with correlative optical-tweezers fluorescence microscopy. The following qualifications, skills and experience are required:

- PhD and Post-Doctoral experience
- Expertise in molecular and cell biology (CRISPR-Cas9, transfection techniques, retroviral/lentiviral infection, cell-cycle/apoptosis analysis, cell-survival and -proliferation assays). Expertise in protein biochemistry will be a plus.
- At least two publications as a first author in peer-reviewed journals
- Excellent written and oral communication skills in English

A 4-year full-time contract (“Ricercatore CNR, III livello, con contratto a tempo determinato”) is offered with a salary of 50,000 Euros/year, starting in February/March 2020. Candidates are invited to send informal applications (containing CV with a publication list) to Francesca M. Pisani (e-mail: [fm.pisani@ibp.cnr.it](mailto:fm.pisani@ibp.cnr.it); mobile: +39- 3396313841).
