Milan, November 19, 2020

A fellowship position is immediately available in the Experimental Cardio-Oncology and Cardiovascular Aging Unit headed by Dr. Angela Raucci at Centro Cardiologico Monzino.

We are looking for a young scientist with a Degree in Biological Sciences, Biotechnology or related disciplines with one or two years of laboratory experience and knowledge in molecular and cellular biology. Previous experience with animal handling is a plus.

The applicant must exhibit a team-working attitude, be self-motivated and have a strong interest in pursuing research in a stimulating scientific environment.

The successful candidate will work on a project aimed at dissecting the molecular mechanisms of cardiac remodeling associated to aging and other cardiovascular risk factors integrating cell culture systems, animal-based models and clinical specimens.

Application should include a CV and at least one reference letter from direct supervisors addressed to:

Angela Raucci, PhD
Experimental Cardio-Oncology and Cardiovascular Aging Unit
