

3-year Post-Doctoral Fellowship

A three-year post-doctoral position is available in the **laboratory of Dr. Sirio Dupont** in the Department of Molecular Medicine of the University of Padova to study **new regulatory mechanisms of metabolism and their relevance for cancer metastasis**.

The current research of the lab is focused on mechanotransduction and how this regulates signaling and metabolism. The ideal candidate should have a PhD in the field of molecular biology, cell biology or metabolism. A good background in cell culture and imaging techniques is requested.

Enquiries and applications can be sent to sirio.dupont@unipd.it explaining why you are interested in joining the lab, including a CV with a brief research synopsis, and contact information for references (name, address, email and phone number).

Applications are accepted from now up to January 15 2022.
