

## RESEARCH OPPORTUNITIES IN MOLECULAR BIOLOGY OF THE SKIN

### Group Leader: Caterina Missero

**Positions:** Two research positions are available in the laboratory of Caterina Missero at CEINGE Biotechnologie Avanzate, Naples, Italy (<https://www.ceinge.unina.it/index.php/en/caterina-missero>).

### Projects:

The first project aims to study molecular pathways and identify therapeutic strategies in cutaneous squamous cell carcinoma (funded by an AIRC Investigator Grant).

The second project aims to establish gene editing therapy for a rare skin disease (funded by a US Research Grant).

### Required qualifications and experience:

Master of Biology or of Biotechnology

Molecular and/or cellular laboratory experience

Written and oral communication skills in English

Additional experience and publications will be considered a plus.

**Starting date (tentative):** January 2025

Salary will be commensurate with CV/experience.

### Applications:

Candidates are invited to send informal applications (including a detailed CV with a publication list and contact details of PIs for reference letters) to Caterina Missero (e-mail: [missero@ceinge.unina.it](mailto:missero@ceinge.unina.it)).
